

REFERENCE

Pallas Foods, Dublin

Application Field

- Floor coating – industrial systems

Structure Type

- Commercial buildings
- Industrial buildings / halls

Brief Description

The new Food Distribution Centre for Pallas Foods (now part of Sysco) in North County Dublin is a €45m facility on 40-acre site and employs around 300 members of staff. The new facility includes two warehouse areas totalling 33,000 sq.m; half of which is dedicated to refrigerated storage areas as well as 2,500 sq.m. of high specification office space.

Products and Systems Used

Remmers Crete RT
Remmers Floormix
Remmers Epoxy CR Color
Remmers Ceramix 03

Pallas Foods, Dublin

Main Problem and Requirements

Over 3000m² of Remmers flooring systems were used in the facility including Remmers Crete RT, a heavy duty polyurethane screed, to the refrigerated storage areas.

Remmers Ceramix coloured quartz was applied to the canteen and wash rooms areas, and Remmers Floormix aggregate was incorporated as a binder to our Epoxy CR Color, a chemical resistant coating which was required for the vehicle maintenance and battery charge areas.
